

Verify RX™

Pharmacy Labeling System

Our Mission: Safe and Efficient Labels

Barcode scanning has been a core tenant of hospital pharmacist workflows for decades; however, pharmacies have yet to implement the technology in several workflows such as expiration labeling and batch compounded medications. Vigilant Verify RX is an easy-to-use and easy-to-implement solution that enables pharmacists to further deploy the proven technology, of barcode scanning.

The Challenge:

Currently, pharmacies purchase and store a large variety of pre-printed labels. Additionally, pharmacy technicians are manually creating labels by mentally calculating expiration dates and handwriting dates on pre-printed stickers or using price guns.

- Error-prone due to the manual calculations; no double check in the process
- Time consuming to handwrite or modify the price guns to the appropriate date
- Labels could be customized to include a lot more information

The Verify RX Solution:

Verify RX dramatically increases efficiency and patient safety by combining best-in-class technologies: thermal printer, barcode scanner, full NDC database from the FDA, and customizable software. Vigilant can modify the solution to print different sizes of labels as well as the format of the printed output. Additionally, the solution has a huge database of image formats to print labels on demand.

- Automate repetitive tasks with barcode scanning, boosting productivity and patient safety
- Easily print expiration labels by scanning medication barcodes
- Create a wide variety of labels on demand
- Reduce costs by stocking only one unit for printing various labels
- Eliminate delays by creating and printing correct labels instantly

Streamlined Pharmacy Labeling: Effortlessly Generate Up to 200 Compliant Labels in Seconds, Tailored to Your Medication Specifications.

Verify RX™ by Vigilant Software

On-Demand labels within seconds
Clear. Consistent. Compliant.

Verify RX: Streamlined Pharmacy Labeling

Experience the ultimate solution in pharmacy labeling with Vigilant's Verify RX. Offering a seamless and cost-effective approach to ensure the safety of compounded medications, Verify RX is priced comparably to pre-printed label tape rolls and even more affordable than just a few prefilled syringes. This all-inclusive solution allows you to effortlessly print compounded drug labels, expiration labels, drug warnings, and more. With extensive customization options and a variety of label types, Verify RX stands as the comprehensive choice for efficient and compliant pharmacy labeling.

Sample label 1 – Compounded Medication Labels

Unique flag label allows for customized free text and auxiliary labeling for special precautions.

About the Vigilant Verify Platform

Vigilant Verify platform has modules specifically tailored to every area of the hospital. From anesthesia syringe labels in operating rooms to IV tube labels in critical care, Vigilant Solutions automates clinician workflow to ensure highly informative labels are implemented with ease. Vigilant research proves the direct correlation between ease of label creation to higher label compliance, therefore reducing medication errors. The Verify Platform is trusted by pharmacists to meet the Joint Commission regulation and ISMP guidelines.
